Ten-year trends in the retention, transfer, and graduation rates of first-time, full-time Maryland public community college students are presented in this report. Tables track students two, three, and four years after matriculation and are broken down by gender and ethnic categories. Since 2004, the Commission has been able to track transfers of Maryland residents to Maryland independent institutions, providing a more accurate view of transfer rates. Hence, the transfer figures for students from 2004 forward may reflect Maryland residents who transferred to independent institutions.

In order to put these data into perspective, this report highlights the four-year “success rate” of Maryland’s community college students. Specifically, it examines the percent of first-time, full-time community college students who, within four years, either graduate and/or transfer to a Maryland senior institution. The success rate gap between men and women is detailed, as are differences in the graduation and transfer rates of various racial and ethnic groups. By special request of the Commission, beginning with the 2007 report, additional detailed data are presented regarding gender gaps in the success rates of African American students.

The degree progress analysis indicators examine the graduation/transfer rate and the “successful persister” rate after four years for three groups of students: “college-ready”, “developmental completers”, and “developmental non-completers”. This concept is intended to provide interim measures of progress. The breakdowns on the basis of remedial needs at entry are designed to reflect the differing levels of preparation with which community college students begin their studies. This information became available beginning with the class entering in the fall 2000 term. Data were reported by most, but not all, community colleges in 2000.

Finally, it is not uncommon for community college students to enroll with goals other than earning credentials or transferring. In order to capture this phenomenon, the report contains results from the community college non-returning student survey.

Definitions

Retention, Graduation and Transfer Cohorts: First-time, full-time freshmen

- Still Enrolled - Student was retained at original community college or transferred to another Maryland community college.
- Graduated/ Did Not Transfer - Student graduated from a Maryland community college with an associate degree or a lower division certificate and did not transfer to a Maryland four-year institution.
- Transferred to a 4-Year - Student transferred to a Maryland four-year institution, with or without degree or certificate.

The Commission cannot track students to out-of-state institutions.

Degree Progress Analysis Cohorts: Students who attempted at least 18 credit hours within two years of matriculation

- College Ready - Student required no remediation.
- Developmental Completer - Student needed remediation in at least one area and, after four years, completed all of the recommended remedial coursework.
- Developmental Non-completer - Student needed remediation in at least one area and, after four years, did not finish all of the recommended remedial coursework.
- Successful Persister - Student earned at least 30 credits with a cumulative G.P.A. of at least 2.0 and graduated and/or transferred to a four-year institution, or is still enrolled.

Highlights

All Students

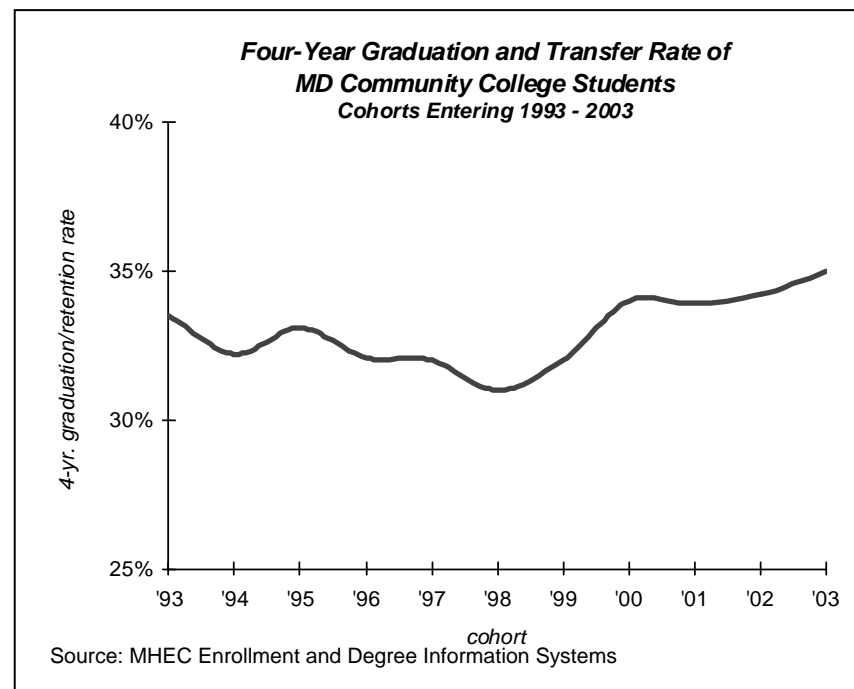

Of the 14,491 new full-time freshmen matriculating in fall 2003, 26.3 percent transferred to a Maryland public or independent four-year college and 8.7 percent graduated and did not transfer. Additionally, 11 percent of full-time freshmen were still enrolled in a Maryland community college four years later which led to an overall retention and success rate of 46 percent.

The four-year graduation and transfer rate of new full-time freshmen entering in the 2003 cohort was 35 percent. **This marks the highest recorded graduation and transfer rate since the 1991 cohort, and the second consecutive annual increase.**

The Maryland community colleges with the highest four-year graduation and transfer rates for the entering class of 2003 were Carroll (45.6 percent), Allegany (40.8 percent), Anne Arundel (40.1 percent), Montgomery (38.0 percent) and the College of Southern Maryland (38.0 percent). Those with the lowest rates were Cecil (21.4 percent) and Baltimore City (20.4 percent).

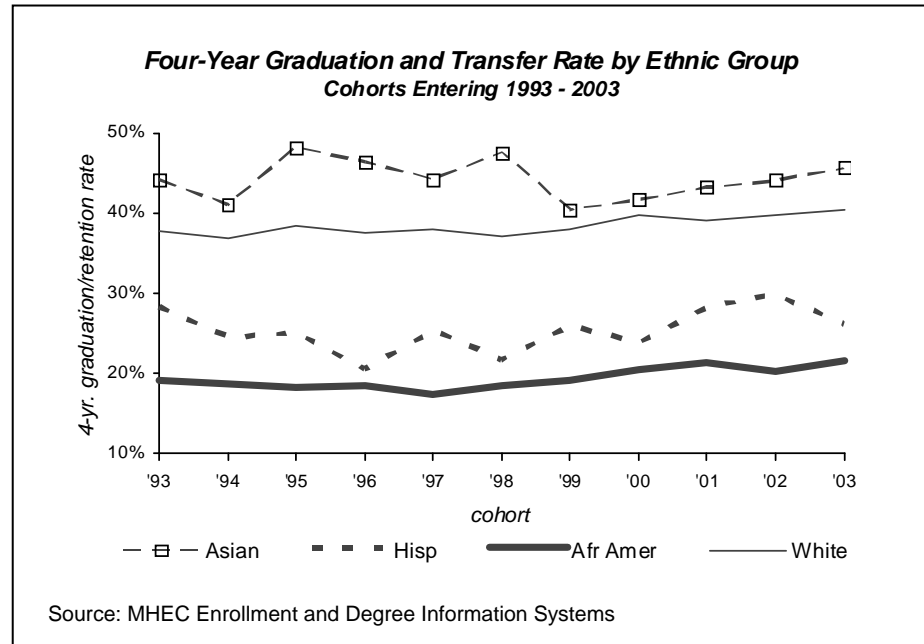

By Gender

Women continue to achieve higher four-year graduation and transfer rates from community colleges than men. In the 2003 cohort, the four-year graduation and transfer rate for women remained at 36.3 percent for a second year while men improved to 33.6 percent, up 1.7 percentage points from the 2002 cohort. This increase in the graduation and transfer rate for men resulted in the smallest gender gap in the past ten years.

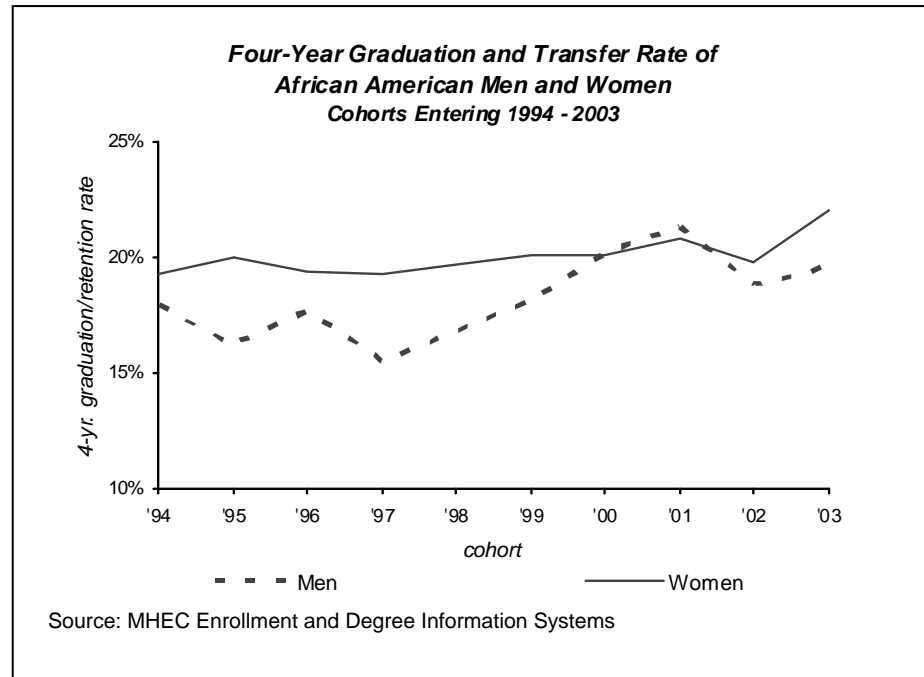

By Racial/Ethnic Group

The graduation and transfer rates of African American and Hispanic students have remained well below the rates of whites and Asians. **However, the rate for African American students in the 2003 cohort achieved a record high of 21.7 percent.** Following last year's increase which reached a ten-year high of 29.9 percent, the Hispanic graduation and transfer rate for the 2003 cohort fell to 26.2 percent. For white students, the rate rose slightly to 40.5 percent, the highest level since the 1990 cohort. The graduation and transfer rate of Asian students rose for the fourth consecutive year to 45.7 percent, and remains the highest of any ethnic group analyzed.

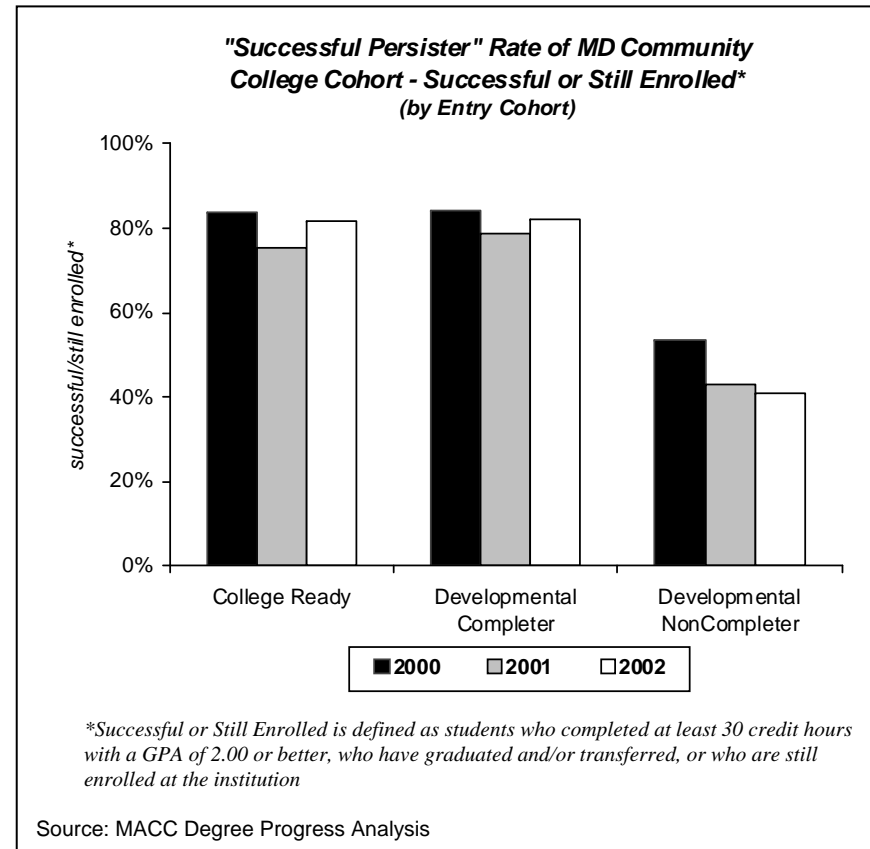

African Americans by Gender

With the exception of two cohorts (2000 and 2001), the four-year graduation and transfer rate of African American women has exceeded that of African American men. The gap between the two groups increased for the 2003 cohort, in which the women's rate (22.0 percent) once again surpassed the men's rate (19.6 percent).

Degree Progress Analysis – Successful Persistence

The 2002 cohort consisted of 15,937 students statewide; 28.6 percent were classified as college-ready, 40.7 percent were developmental completers, and 29.7 percent were developmental non-completers. This distribution represents an overall improvement, as the number of students classified as developmental completers increased while those who had not completed their developmental coursework fell. As was the case with previous cohorts, the successful persister rates for college-ready students and developmental completers were quite similar (81.6 percent and 82.2 percent respectively) with the developmental completers again achieving a slightly higher successful persister rate than the college-ready students. For the third straight year, the successful persister rate was considerably lower for developmental non-completers than for the other two groups (41 percent). Another trend continued, with the transfer and graduation rate for college-ready students (61.8 percent) and developmental completers (52.5 percent) in the 2002 cohort exceeding the average rate for all students (47.5 percent).

Measuring Outcomes of Students with Educational Goals Other Than Graduation or Transfer

Since 2000, Maryland's community colleges have surveyed students who enroll in one term but do not return in the next. Because the survey asks about students' educational goals, the results provide valuable information about the experiences of non-returning students who did not intend to earn a degree or certificate, or to transfer to a four-year college. Based on the 2,481 responses to the 2007 survey, 38 percent of students enrolled without aspirations of earning a credential or transferring. This figure is highly consistent with those reported in earlier surveys. Non-returning students' other goals included updating skills for a current job, preparing for a new or different career, self-enrichment, or learning English as a second language. As an outcomes measure, students were asked whether their goal had been met. In the 2007 survey, almost three-fourths of the students with educational goals other

than graduation or transfer reported that their goals had been met. Individual campus survey results are found in the last section of this report.

* Analysis Cohort = students who attempt at least 18 hours within two years of matriculation

** Successful or Still Enrolled is defined as students who completed at least 30 credit hours with a GPA of 2.00 or better, who have graduated and/or transferred, or who are still enrolled at the institution

+ Allegany data is obtained from sources not including the National Student Clearinghouse.

++ Totals reflect summation of cohort data as reported by the colleges, and derived percentages based solely on the reporting institutions. These may provide an "indication" or estimate of the statewide community college success levels, but should not be relied upon as a completely accurate measure at the statewide level.
